

Leet question 876 (Done) (did myself)

Day 17

Reverse A linked list

```
void reverseList() {  
    Node prevNode = head;  
    Node currNode = head.next;  
  
    if (head == null || head.next == null) {  
        return;  
    }  
  
    while (currNode != null) {  
        Node nextNode = currNode.next;  
        currNode.next = prevNode;  
  
        prevNode = currNode;  
        currNode = nextNode;  
    }  
  
    head.next = null;  
    head = prevNode;  
}
```

This is the iterative way

Day 17

Recursive way

```
Node recursiveReverse(Node head) {  
    if (head == null || head.next == null) {  
        return head;  
    }
```

```
    Node newHead = recursiveReverse(head.next);
```

```
    head.next.next = head;  
    head.next = null;
```

```
    return newHead;
```

```
}
```

```
}
```
