

ArrayList Java

```

import java.util.ArrayList;
import java.util.Collections;

public class Day11 {
    public static void main (String[] args) {
        ArrayList<String Integer> list = new ArrayList<>();
        // < String > // 1 = " " " "
        // < Boolean > // 2 = " " " "

        // Add values in arraylist.
        list.add(1);
        list.add(3);
        list.add(4);
        list.add(5);
        System.out.println(list);

        // get element from arraylist.
        int same = list.get(1);

        // Add element in between.
        list.add(1, 2);

        // set element (changing value in index)
        list.set(0, 5);

        // Remove element.
        list.remove(0);

        // size of list.
        int size = list.size();

        // Sorting.
        Collections.sort(list);
        System.out.println(list);
    }
}

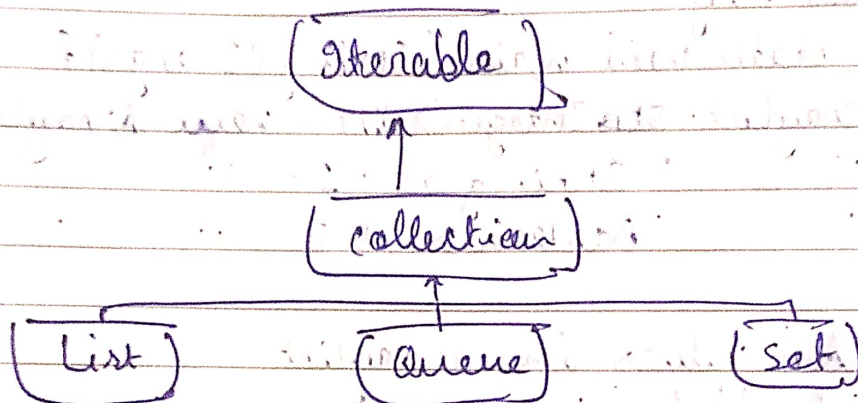

```
